BLAZER SIZE GUIDE

Top tips from customers who have previously bought school blazers.

- *“Always anticipate growth spurts, the school blazers should not be a tight fit, otherwise you will be buying another blazer in a few months’ time, spending more money”*
- *“Most of the time we buy a size up, this ensures the blazer lasts longer, we can always turn the arms up if they are longer, very easy to do.”*
- *“The blazers lasted the full year, very good quality and material, you can easily sponge of most stains.”*

What do we suggest.

We have a size chart below and as you can see from the illustration below (arrow) this is the place you should be measuring your child to get the best size. The girls fit is slightly fitted so you do need to anticipate for that. We do agree with customers who recommend going a size up, however this is at the discretion of the customer.
